

Sintered and fired rather than
being painted black.

For anyone who doesn't want a dark facade
but wants a look that will arouse fascination.

VINTAGE LOOK
RETRO BRICK SLIPS
WITH A POLISHED EFFECT
EXTRA SLIM
IN LONG FORMAT

GLANZSTÜCKE

Clean shining, quickly to lay,
with a used look texture,
but still with a smooth surface appearance.

THE NEW GENERATION OF CLINKER BRICK SLIPS

High-fired at 1.200 degrees to provide hardness. A building clad in clinker brick slips is impervious to wind, bad weather and other climatic factors. Whether a renovation or a new build, and whether for creating distinctive interior walls or a glamorous facade together with plaster or fully-clad on an EIFS: with „Zeitlos“ and „Glanzstücke“, the topic of wall design with ceramics has been given a whole new interpretation.

Energy-aware brick expressionism
with an "old" appearance offering
easy-to-apply precision.
